CTTC

Chapter Technology Transfer Committee (Training Courses)

Jonathan Bushman
Help! As your CTTC (Chapter Technology Transfer Committee) Chair, I need some idea of what would be a good course to hold. Here are some ideas from the ASHRAE Learning Institute.

- Fundamentals of Air System Design
- Fundamentals of Building Operation, Maintenance, and Management
- Fundamentals of Heating and Cooling Loads
- Fundamentals of Heating Systems
- Fundamentals of Psychrometrics (Moist Air Properties)
- Fundamentals of Refrigeration
- Fundamentals of Steam System Design
- Fundamentals of Thermodynamics
- Fundamentals of Water System Design

Mike Nemeth also suggested that we may want to consider working with the Saskatchewan chapter of the Canada Green Building Council to have a one day course on Passive House Design and Construction. Please let me know what you think.

If you want to suggest a CTTC course, then please email me at jbushman@marchconsulting.com.

PAOE Points
PAOE stands for Presidential Awards of Excellence and PAOE points encourage chapters to work towards the goals of the society and to some degree the current society president. If you are involved in any of the following activities, please send an e-mail to jbushman@marchconsulting.com with the details so they can be included in our PAOE reporting:

- participating in a K–12 student activity
- mentor student design Team
- participation in National Engineering Week Activity
- hiring an Engineering College or Tech School Student (part-time or summer intern)
- renewed an ASHRAE certification (e.g. High-Performance Building Design Professional)
- won an ASHRAE award (e.g. Technology Award)
- nominated someone for an award or as an ASHRAE Fellow
- published an article in the ASHRAE Journal, Handbook, or other publication
- attending the ASHRAE Winter or Annual Meetings this year

Student Activities

Greg Scrivener
Work continues this year on reviewing and updating our scholarships at both SIAST and the U of S, hopefully we will be able to reward students who are interested in the HVAC/R industry. We have a HVAC/R lecture and tour planned for the ME491 class at the U of S again this year and we will again be inviting any 4th year design project teams with industry related projects to present at a monthly meeting this winter. The November meeting will be a Student night; say 'hi' to any students who show up for the tour. Have a good month!
