This program would not be made possible without the initial financial support of the following:

Comstock Canada Ltd.
MCA Hamilton
Great West Life

The **Canadian Mechanical Contracting Education Foundation (CMCEF)** proudly presents the exclusive Gold Seal Accredited CMCEF Supervisory Program. After much research and countless hours of collaboration with many experts, CMCEF feels that it has the most comprehensive Supervisory program available to the construction industry. This program will take place over a 7-day period and will be split into two sessions; the first will be 4-days, followed several weeks later with a 3-day session. An assignment must be completed between the two sessions.

Target Audience

The target audience for this course is foremen superintendents working in a supervisory capacity for a Construction Contractor. Apprentices have also indicated that this course is very useful in helping them to understand the role of the foreman and supervisor thus assisting in their day to day routine. This course is designed with the adult learner in mind and emphasizes participant/instructor group interaction.

Course Outline

Course content will include but not limited to the following broad topics:

- **Planning a project**, to include an understanding of the phases of construction, the staffing issues associated with construction, and the documents and protocols governing the construction process.
- **Executing the work**, emphasizing the importance of having key project controls in place to assist in managing the job site as the work is being performed as well the techniques for maintaining jobsite harmony.
- **Monitoring the work**, stressing an understanding of the elements and importance of monitoring the project as the construction progresses from start-up through to close-out.
- **Closing-out a project**, providing an understanding of the steps involved in closing out a project and stressing the importance it has for future projects.

Course Assessment

Course Assessment consists of various assignments and a case study. In total there are seven (7) and will cover the following:

- One group home assignment on "*Production Management*"
- One individual home assignment on "*Prioritizing the Work*"
- One in-class group break-out assignment on "*Tools and Equipment Management*"
- One basic case study on "*Cost Coding*"
- Three assignments on "*Change Orders, Planning and Scheduling Work, and Material Laydown*"

Your Instructor:

Gary Leaman and/or Guy Brideau will lead the 7 day program. Both Gary and Guy have been instructors, teaching Supervisory courses to the industry for many years. Also, both gentlemen have worked extensively on the development of this program and are extremely familiar with the content.
